

Beverly Wang

Lead Product Designer · Enterprise UX & AI/ML Product Design

(213) 282-9903 | beverlywang.design@gmail.com | beverlywang.github.io | linkedin.com/in/beverlypwang

Summary

Lead product designer with 7 years turning complex data platforms and enterprise infrastructure into intuitive, high-craft experiences at Fortune 500 scale, now designing AI-native products.

Skills & Tools

Tools: Figma (components, auto-layout, variables), Figma Make, Claude Code, Cursor

Specialties: Enterprise SaaS, Observability Platforms, Developer Tools, Data-Intensive UX, Design Systems, AI Prototyping, AI-native UX, Agentic Workflows, User Research, Data Visualization

Leadership: Design Strategy, Cross-Functional Collaboration, Mentorship, Workshop Facilitation

Experience

Lead Product Designer · Arctera

San Ramon, CA · Dec 2024 to May 2026

AI Enterprise 0-1 Data Compliance Design Systems

- **Led 0-1 design from the ground up** for a next-generation SaaS data compliance and observability platform, from discovery and research through high-fidelity design and developer handoff, raising task-completion rates and moving the platform's usability rating from "Difficult" to "Easy."
- **Spearheaded a chat-based AI compliance assistant** that resolved **70% of compliance questions** without human support, with graceful error handling that steered users toward answerable questions; major enterprise customers requested early access ahead of general availability.
- **Pioneered AI-generated insight experiences**, defining how users query, interpret, and act on model output within complex enterprise workflows, saving users an estimated **15 hours per week**.
- **Drove team-wide adoption of AI-powered design workflows** using Claude Code and Figma Make, cutting concept-to-prototype time from **days to hours** and setting a new bar for prototyping.
- **Architected and scaled core design system components** adopted across **10+ products**, establishing company-wide standards across cloud and on-prem products.

Senior Product Designer · Veritas Technologies

Santa Clara, CA · Mar 2022 to Dec 2024

Enterprise SaaS Data Infrastructure Developer Tools Security

- **Owned end-to-end design for complex infrastructure** spanning compute, deployment, storage, and security, shipping developer-facing workflows to **80K+ customers, including 87% of the Fortune 500**.
- **Shipped a migration-planning product from the ground up**, translating a complex, multi-step process into a guided workflow that saved customers weeks of planning time per migration.
- **Introduced a standardized heuristic-evaluation method** adopted across the entire design and research team, lifting team productivity by **20%**.
- **Mentored 3+ junior designers and interns**, earning 100% positive feedback; recognized with **6 WOW Awards** for exceptional UX and business impact.

Product Designer · Veritas Technologies

Santa Clara, CA · Aug 2019 to Mar 2022

Enterprise SaaS Admin Workflows Data Visualization

- **Streamlined complex administrator workflows** including onboarding, policy management, multi-tenancy, and dashboards, driving a **20% increase in customer satisfaction**.
- **Developed data visualization guidelines** adopted across teams, cutting design-to-development time by **40%** and improving cross-product consistency.

Education

MS, Human-Computer Interaction · University of Michigan, Ann Arbor · 2019

BBA, Marketing · College of William & Mary · 2014
