

Beverly Wang

Lead Product Designer · Enterprise UX & AI-Powered Design

Los Angeles, CA · (734) 546-8986 · beverlywang.design@gmail.com · beverlywang.github.io

Summary

7 years designing complex enterprise SaaS and on-prem products at Fortune 500 scale. Expert in Figma, design systems, and AI-accelerated prototyping (Claude Code, Figma Make). Drives design strategy from research through implementation, influencing product direction across cloud and hybrid platforms.

Experience

Lead Product Designer · [Arctera](#) *Dec 2024 – Present · San Ramon, CA*

- **Pioneered AI-powered design workflows** using Claude Code and Figma Make, boosting team productivity by **50%** and raising the bar for prototyping innovation.
- **Led end-to-end design strategy** for a next-gen SaaS data compliance platform—from discovery and research through high-fidelity design and developer handoff.
- **Architected and scaled core design system components**, reducing UI inconsistencies by **50%** and establishing company-wide standards across cloud and on-prem products.
- **Championed user-centered design** by driving design direction with product and engineering leadership—shaping roadmap priorities and owning design scoping and planning.

Senior Product Designer · [Veritas Technologies](#) *Mar 2022 – Dec 2024 · Santa Clara, CA*

- **Drove principal-scope design initiatives** across **100+ workflows and 10+ enterprise products** in data security, compliance, and storage—delivering measurable usability gains at scale.
- **Led product development from concept to launch**, shipping solutions to **80K+ customers including 87% of Fortune 500 companies**.
- **Mentored junior designers** and earned 100% positive feedback; recognized with **6 WOW Awards** for exceptional UX and business impact.

Product Designer · [Veritas Technologies](#) *Aug 2019 – Mar 2022 · Santa Clara, CA*

- **Designed complex administrator workflows**—onboarding, policy management, multi-tenancy, and dashboards—driving a **20% increase in customer satisfaction**.
- **Developed data visualization guidelines** adopted across teams, cutting design-to-development time by **40%** and improving cross-product consistency.
